

The Sun Jar comes with the **Sonnenglas® SOMO** Solar Light.
Sun Jar 1000ml = SOMO · Sun Jar 250ml = SOMO Mini

Sun Jar Care & Use Guide

Sonnenglas®

Light – Your Way

1 Liter of Sunlight – Endless Possibilities

The Sonnenglas® Sun Jar stores solar energy during the day and provides you with warm, atmospheric light in the evening – perfect for your home, balcony, or garden. A lighting solution that is not only sustainable but also incredibly versatile – bright enough to read by.

The highlight: Redecorate the inside of your Sonnenglas® Sun Jar again and again to create your own unique light.

With the magnetic flip switch, you can manually turn on your Sun Jar. The day/night sensor ensures that the light automatically turns off in daylight and switches back on in the evening.

Handling Instructions

- Charge in direct sunlight or by USB-C (see SOMO manual).
- To decorate, remove the SOMO solar light by opening the lid.
Add dry objects only.
- Align the SOMO solar light's dots with the flip switch.
Twist SOMO or the wire harness if needed.
- Use flip switch to turn ON/OFF. It also activates Day/Night sensor.
- Screw the lid on tightly for proper sealing when used outdoors.

Care Instructions

- Clean the SOMO solar panel regularly for better charging.
- Keep in a bright place or charge every 3 months via sun or USB.

Materials

- Glass (~60% recycled content).
- Stainless steel wire harness, screw ring and magnetic flip-switch.
- SOMO solar light.
